WORLD-CLASS CANCER TREATMENT BEGINS WITH RESEARCH

When you're diagnosed with cancer, time is critical. Every minute counts, and the wait for surgery, for treatment, for life to get back to normal can seem agonizing. Time is critical in the world of cancer research, too. Every day, scientists are working on new and better therapies. The sooner these therapies can be delivered to patients, the better their chances for recovery.

Supporting cancer research at The Ottawa Hospital will:

- Ensure researchers have the latest tools to compete and work with top global research centres.
- Allow the Hospital to purchase new equipment to purify, visualize and study cancer cells, and conduct clinical trials.

ITnet 2014 GOAL

\$14,650 To Purchase a DNA Replicator

Cancer cells have genetic mutations that make them different from healthy cells. The next generation of cancer therapies will target these genetic mutations, so treatments only kill cancer cells. The DNA replicator allows researchers to generate DNA, so they can develop these new targeted therapies.

YOU MAKE A DIFFERENCE.....10 YEARS OF GIVING!

For the 10th consecutive year, ITnet will be impacting patient care at The Ottawa Hospital. The impact of ITnet's support of much needed equipment can be felt throughout the Hospital:

2004– Tourniquet system

2009– Centrifuge

2005– Stretcher Chair and Patient Warming Unit

2010– Cell Spinner

2006– Broncoveidoscope

2011– White Coat Challenge Chemo Bay

2007– Transport Ventilator

2012– Cyberknife Software Upgrade

2008– Comprehensive Chemotherapy Package

2013– Capillary Sequencer

With the purchase of a DNA Replicator, our giving will reach \$200,000—incredible!

Please see reverse for how you can help.
